

## Sun safety - procedure

During the summer months (October to March), we ensure that children are protected from the sun as follows:

- 1. Sunhats must be worn outside in terms 1 and 4.
- 2. School children are supervised while they put on their own sunscreen before going outside.
- 3. There are regular newsletter reminders for parents to ensure children come to School with protective clothing including hats.
- 3. The School grounds have shady areas for staff, children, parents and visitors.
- 4. Where children are allergic to standard sunscreens the School staff must be notified by the parents and an alternative named sunscreen provided by the parent or an indication that a hat must be worn at all times whilst outside.
- 5. School children will reapply sunscreen before going outside in the afternoons as in 2. above after lunch.
