Targeted Funding Review procedure

Introduction

Targeted funding may be received by Kindergarten from the Ministry according to the number of children at the service who have lived in socio economically disadvantaged households. The calculation is automatic according to the addresses of children enrolled.

The Kindergarten uses this funding in such a way so that

- Kindergarten is accessible to all, regardless of socio economic background
- Tamariki are not identified as coming from such a background

Procedure

Targeted funding is received by the kindergarten and used 100% to reduce the need to charge fees to parents, and thereby making the service accessible to all.
